

User Lifecycle, RBAC & Session Management

Identity & Access Management (IAM) portfolio case study | Test identity: Alex Chen

Project overview

Documented administrative actions in Microsoft Entra ID covering a direct Helpdesk Administrator directory role assignment, user attribute updates, security group membership, account disabling, and session revocation. The supplied Entra audit evidence records the account changes and containment actions.

Environment & focus

Platform: Microsoft Entra ID **Target:** Alex Chen (test account)

Skills: RBAC, user lifecycle management, security groups, audit logging, account containment.

Documented workflow

1. Assign Helpdesk Administrator at directory scope (direct role assignment).
2. Update user profile from Engineering / Junior developer to Security Operations / Associate Security Analyst.
3. Add the account to Sec-Grp-SecurityOps.
4. Disable account sign-in and revoke sign-in sessions.
5. Review audit logs for account, group, and refresh-token timestamp changes.

Evidence selection

Six key screenshots are reproduced from the original supplied report. Screenshots are retained as source evidence; the report does not claim that a fresh sign-in was tested after revocation.

Administrative roles

Administrative roles can be used to grant access to Microsoft Entra ID and other Microsoft services. [Learn more](#)

Search by name or description

Add filter

☐	Name	Description	Resource name	Resource type	Assignment path	Role type
☐	Helpdesk Administ	Can reset passwords for non-administrators and Helpdesk Administrators.	Directory	Organization	Direct	Built-in

Helpdesk Administrator appears as an assigned directory role for the test user.

02 User profile update

Audit Log Details

×

Activity	Target(s)	Modified Properties	
Target	Property Name	Old Value	New Value
achen@jo...	Department	["Engineering"]	["Security Operations"]
achen@jo...	JobTitle	["Junior developer"]	["Associate Security Analyst"]
achen@jo...	Included Updat...	"Department, JobTitle"	
achen@jo...	Targetid.UserTy...	"Member"	

Audit modified properties show the department and job-title transition.

ACCESS & ACCOUNT CONTAINMENT

03 Security group membership

Audit Log Details				✕	
Activity	Target(s)	Modified Properties			
Target	Property Name	Old Value	New Value		
achen@jo...	Group.ObjectID		"a096ae18-94c8-4511-8ce3-6dd04f041082"		
achen@jo...	Group.DisplayN...		"Sec-Grp-SecurityOps"		

Audit modified properties record the Sec-Grp-SecurityOps group addition.

04 Disable account activity

Audit log records a successful disable-account activity.

SESSION REVOCATION & RESULTS

05 Refresh-token revocation

The screenshot shows a window titled 'Audit Log Details' with a close button (X) in the top right corner. It contains a table with the following data:

Activity	Target(s)	Modified Properties	
Target	Property Name	Old Value	New Value
achen@jo...	StsRefreshToke...	["2026-09-20T15:45:36Z"]	["2026-09-20T19:22:18Z"]
achen@jo...	Included Updat...	"StsRefreshTokensValidFrom"	

Modified properties include StsRefreshTokenValidFrom, evidencing the session-revocation action.

06 Session revocation confirmation

Successfully revoked sign-in sessions

Successfully revoked sign-in sessions for user Alex Chen.

Microsoft Entra displays a successful sign-in session revocation confirmation.

Outcome & security significance

The supplied audit trail supports that role assignment, user profile changes, group membership modification, account disablement, and session revocation were carried out. Blocking sign-in prevents new authentication; revoking refresh tokens helps contain ongoing access, although already-issued access tokens may remain valid until expiry or other enforcement.
